Alajuela, Costa Rica · [LinkedIn](#) · [GitHub](#) · [Vercel](#) · +506 87557535 · estebanrojasquesada@gmail.com

Web Developer with over 3 years of professional experience in creating digital solutions. I have played key roles in projects, collaborating with multidisciplinary teams to ensure the delivery of high-quality products. With strong skills in solving complex technical challenges, I am focused on delivering effective solutions, always committed to continuous improvement and achieving impactful results.

PROFESSIONAL EXPERIENCE

LinkAmerica Labs

Frontend Engineer

San Jose, Costa Rica

July 2022 – Present

- Participated in the refactoring of the company's core application, modernizing its architecture and adapting it to new technologies, improving performance and functionality.
- Developed a web application for managing routers and networks, enabling users to monitor data consumption, create alerts, and generate detailed reports.
- Designed and implemented a mobile solution for locating devices via wireless signals, optimizing the identification and classification of environments with hundreds or thousands of units, streamlining operational processes.
- Contributed to the development of a mobile application for performing electrocardiograms and generating medical reports, complemented by a web portal for viewing results and recording user observations.
- Automated testing through test cases integrated into CI/CD pipelines, ensuring deployments succeeded only after passing validations, improving software quality.
- Built a web-based file exploration application for managing large data volumes, leveraging NextJS API functionality as an intermediary, enabling communication with a backend secured by VPN, and ensuring safe access.

Freelance

FullStack Engineer

- Developed an application for scraping cryptocurrency trading transactions, focused on analyzing effective accounts, enabling data extraction and analysis.
- Built a web application for managing reservations in an event and activity space.
